ANNEXURE A
Explanatory Note on the Draft Development Plan 2021 A.D. for Controlled Area Sohna

INTRODUCTION:

With the backdrops of picturesque Aravali ranges on its West, Sohna is an important old town. As viewed from the top of the hills, where a tourist/ recreational complex has been developed by the Haryana Tourism, the town amalgamated with its green rural background presents a fascinating scenic beauty. The town is also famous for being blessed with boiling hot sulphur spring in the heart of the town with a temple complex around it. Because of their faith and belief, people having skin diseases visit this town to have a holy and clinical dip in the kunds having spring water, to get rid of their diseases.

Provision and maintenance of general civic services in the town is being done by the municipal committee. It is a tehsil of Gurgaon district. The town is providing shopping, educational, medical and mandi facilities to surrounding rural areas.

Location and linkages:

Sohna town is situated at the 24th kilometers stone on the Gurgaon-Alwar road and makes important junction at Palwal-Rewari road. Other important cities/towns in the region around Sohna are Delhi, (56 kilometers) Gurgaon (24 kilometers), Faridabad (35 kilometers), Palwal (30 kilometers), Nuh (20 kilometers) and Rewari (45 kilometers), The town is very well served by frequent bus services from all sides.

Includes 10544 population of urban villages.
The population of Sohna town in 2001 AD including the population of villages Jakupur, Raisika and Kanwarsika is 30,933 persons approximately and by assuming the growth rate i.e. 100%, 120 % for the decade 2001-2010 and 2011-2021, the projected population for 2021 AD will be 1,67,706 persons. This exorbitant growth rate is expected because a lot of regularized colonies are coming in the town rapidly and the town falls within the potential zone as the express-way is adjoining in the southern side of the town.

Proposals:

The main Sohna town is bounded by Aravali ranges on the west, a bundh and partly low lying pockets of land on the north, bye-pass to Gurgaon-Sohna-Alwar road on the east, and forest land on the south. Due to topographical conditions of the area around Sohna, the suitable land for the development lies in the north-east, east and south-east of existing Sohna town. The existing bye pass is highly congested and obstructs the smooth flow of the traffic. However, a new bye pass/ outer ring road is proposed to expand the town eastern side of the existing bye pass.

Requirement of land for the various major land uses for an additional population of approximate 1,68,000 by 2021 AD has been worked out. The draft development plan Sohna 2021 AD has been prepared for a population of 1,68,000 persons. The extent of various land uses is given below:-

The proposals exclude the 77.33 hectare of the existing town.

DESCRIPTIONS OF LAND USES

RESIDENTIAL:
To accommodate an additional projected population of 1,68,000 persons an area of 680.00 hectare has been proposed for the development of residential sectors. The residential density proposed is 250 persons per hectare which is quite reasonable. The additional residential use has been proposed in the east of town between the existing and proposed bye-passes. The sectors proposed for residential use are 6, 7, 10, 11, 12 and 14.

COMMERCIAL:
The main commercial business is being done in the narrow streets/ bazaars of the existing town. Another potential area for this purpose which is on the present bye-pass has been proposed for commercial activity. An area of 135.00 hectares has been proposed for commercial use in sector- 2, 3 and 9, and a commercial pocket existing in industrial sector 15 and 16 was planned by Haryana Urban Development Authority to cater the need of commercial activities of these sector.

INDUSTRIAL:
The industrial area Rozka Meo and textile valley (sectors-15and16) developed by Haryana Urban Development Authority covering an area of approximately 89 Hectares is falling on the Sohna-Nuh road. A few industries have been set up in the proposed industrial zone. It is however observed that because of availability of good quality stone around this town there is a good scope of stone crushing industry also. However, an additional area of approximate 204 hectares has been proposed for industrial use in the south of the town upto the expressway in sector 17, 18 19 and 20 (part). The land located in these sectors is mainly waste land, not being used for agricultural purpose.

Inspite of the above, the provision of 100 meters wide green belt as the village development area has been made around all the village settlements which falls in the industrial sectors. The main purpose of this open space is for the infrastructural facilities for the villages and to prevent the major building developments.
TRANSPORT AND COMMUNICATION:

An area of approximate 92.90 hectares in sector-21 has been proposed for transport nagar. This area has been proposed in the south along existing Gurgaon-Alwar road near proposed expressway. The hierarchical pattern of road networks has been adopted in the plan. A minimum width of 45 meters has been proposed for sector dividing road. The width of Gurgaon-Alwar road and Rewari-Palwal road has been the existing width with green belts of 45 meter and 60 meters respectively. The classification of roads and land reservation has been given in following table:-

To avoid the local traffic of the town an additional link road near village Lakhuwas by adding the Sohna Palwal road with the proposed eastern bye-pass has been proposed.

PUBLIC UTILITIES:

An area of about 48.00 hectares in sector-13 and sector 20 part. An area of 62 hectares in agricultural zone has been earmarked for the use of public utilities. These two sites for disposal works and a site for water supply have been proposed in village Barota, Garhi Murli and Ghamrauj. The site of villages Garhi Murli and Ghamrauj, Mendwara will also serve the Gurgaon-Manesar Urban Complex.

PUBLIC AND SEMI PUBLIC USES (INSTITUTIONAL):

At present there are two senior secondary schools and one privately managed college. An area of about 335.00 hectares has been proposed as institutional sector-4, 5, 2 (part) and 3(part) for future institutional purposes.

OPEN SPACES:

With the development of a beautiful tourist recreational complex at Sohna, it has started attracting tourists and people from the surrounding regions for picnic and funfare. With its scenic beauty all around, Sohna has a potential to be developed as a regional recreational center. An area of about 36.30 hectares has been proposed for town park/ recreational activities of regional level etc. A 100 meter wide green belt along proposed bye pass 60 meters wide green belt along Rewari-Palwal National Highway number-71B proposed bye-pass and 45 meter wide green belt along Gurgaon-Alwar-Sohna-Ballabhgarh scheduled road have been provided. These green belt and open spaces/ parks comprise of about 780.00 hectares acres.

URBAN FOREST:

Keeping in view the surrounding mountainous topography and existence of Aravalis, an area of approximate 425 hectares has been proposed to be developed as urban forest to protect the natural environment.

AGRICULTURAL ZONE:

A sizeable area has been reserved as agricultural zone. This zone will, however, not eliminate the essential building development within this area such as the extension of existing village contiguous to abadi-deh if undertaken under project approved or sponsored by Government for other ancillary and allied facilities necessary for maintenance and improvement of an agricultural area.

Zoning Regulations:

The legal sanctity to the proposals regarding land use is being given to the effect by a set of zoning regulations (Annexure B) which form a part of this development plan. These regulations will govern the change of land use and standards of development. They also will elaborately detail out allied and ancillary uses which will be permitted in the various major land uses and stipulate that all change of land use and development shall be in accordance with the details shown in the sector plan thereby ensuring the preparation of detailed sector plans for each sector to guide the development and enforce proper control.
